Introduction

Computer Science and Engineering student specializing in Artificial Intelligence at Parul University. Skilled in machine learning, deep learning, and Large Language Models, with a growing focus on RAG. Passionate about developing AI solutions that address real-world challenges.

Education

Parul University , B.Tech. - CSE - Artificial Intelligence	2022 – 2026
- CGPA: 8.2/10 - Relevant Coursework: Machine Learning, Data Visualization, Generative AI	
Indian School Sohar , 12th Grade	2022
Percentage: 83.80/100	

Experience

Machine Learning Intern , Infotact, Hyderabad	Jun 2025 – Aug 2025
- Developed a recommendation system to suggest relevant case laws and legal documents for lawyers. - Applied NLP techniques and collaborative filtering to improve search relevance and accuracy. - Collaborated with the team to deploy the system for practical use in the legal domain.	
Data Analytics , Deloitte	May 2024
- Participated in a virtual job simulation to understand data analytics in a business context. - Developed skills in data analysis and visualization using tools like Tableau and Excel.	

Projects

Book recommendation system using Langchain	github.com/Ron5866/book _r ecommdation
Developed a semantic book recommendation system using LangChain, OpenAI embeddings, and Gradio for an interactive user interface.	
Career Assistant Chatbot	github.com/Ron5866/chat _{bot}
Developed a rule-based/NLP-powered chatbot for CLAT-related queries using Streamlit.	
Sentiment Analysis Project	github.com/Ron5866/sentiment _a nalysis
Built a sentiment analysis tool using OpenCV and TensorFlow/Keras to analyze facial expressions.	
Movie Recommendation System	github.com/Ron5866/mentor _r ecommdation
Developed a recommendation system using collaborative filtering and content-based techniques.	

Certifications

IBM Python Certificate	May 2023
Career Essentials in Generative AI	Sep 2023
Machine Learning Course	Feb 2024

Technologies

Languages: Python, Java

Technologies: RAGs,LLMs, CNN, RNN, Streamlit, Data Visualisation,Transfer Learning, NLP, NLTK, OpenCV, YOLO-V5, Version Control, Agentic AI, Hugging Face Transformers,Langchain
